Officer name:

Title

First Name

Surname

Reference

Date (must be pre-application submission)

Details of the pre-application advice received

Reference:

Detailed pre-application response was provided including comments from CCBC Policy, Ecology, Highways, Waste Management and Housing Team. It concluded that the principle of development would be acceptable as the site is previously developed land, which is no longer safeguarded as open space, within the development boundary and supported a proposal for 100% affordable housing. Housing mix and design was generally supported, feedback was provided on aspects such as residential amenity, landscaping and highways were also providing suggestions or additional information to be provided. The development density was also flagged as a potential issue as it was above the Council's expected density standards with specific regards to residential amenity impacts in the north-eastern corner of the site. Concerns were raised over flood risk due to the site's location within a TAN15 C1 Flood Zone and that a revised TAN would be likely to come into force which would not support highly vulnerable development in these areas.
